

# ECON 2301

## Principles of Economics 1

### Western Texas College

- I. Basic Course Information
  - A. Course description - An analysis of the economy as a whole including measurement and determination of Aggregate Demand and Aggregate Supply, national income, inflation, and unemployment. Other topics include international trade, economic growth, business cycles, and fiscal policy and monetary policy. (Rd, Wtg)
  
- II. Student Learning Outcomes
  - A. Explain the role of scarcity, specialization, opportunity cost and cost/benefit analysis in economic decision-making.
  - B. Identify the determinants of supply and demand; demonstrate the impact of shifts in both market supply and demand curves on equilibrium price and output.
  - C. Define and measure national income and rates of unemployment and inflation.
  - D. Identify the phases of the business cycle and the problems caused by cyclical fluctuations in the market economy.
  - E. Define money and the money supply; describe the process of money creation by the banking system and the role of the central bank.
  - F. Construct the aggregate demand and aggregate supply model of the macro economy and use it to illustrate macroeconomic problems and potential monetary and fiscal policy solutions.
  - G. Explain the mechanics and institutions of international trade and their impact on the macro economy.
  - H. Define economic growth and identify sources of economic growth.
  
- III. Major Course Requirements
  - A. Exams and Quizzes. There will be multiple exams and quizzes spaced throughout the semester. Exam and Quiz questions may include any combination of the following: true/false, multiple choices, fill in the blanks, short answer, graphs, and essays.
  - B. Writing Assignments/Project. There will be a writing assignment or project during the semester.
  - C. Collaborative Exercises. There may be several collaborative exercises (Applies to campus-based classes) spaced throughout the semester. Each of these assignments will require you to work with your peers in solving economic problems and analyzing micro economic markets and their behavior
  - D. Forums: (Online Courses Only) There will be several discussion forums spaced throughout the semester. Each discussion will take place online, making use of the college's online platform—D2L.
